# QUATTRO PLUS BAILEY

### TRIKE ATTACHMENT FOR PARAMOTOR

**Many customers have asked us if we could adapt the design of the Quattro trike to allow there Bailey paramotor to be bolted on to convert their paramotor into a fully fledged trike, so this is our answer, the Quattro Plus.**

The Quattro Plus shares the same fantastic form as the Quattro, but has a ingenious mounting system that utilises the hang bar sockets of our paramotor range and the existing quick release pip-pins to convert from paramotor to trike in a few minutes with no tools. Simply remove your paramotor harness, hang bars and fuel tank and then attach the dry break coupling from your motor to the Quattro Plus 22 litre tank and you are ready to launch.

With its design elements inspired from sand karts, the Quattro Plus not only looks unique with its tough, moulded bodywork finished in eye catching red, but is also superbly comfortable due to its sculpted bucket seat (with rear accessory pocket), adjustable harness, and adjustable wheelbase(130cm-180cm) to cater for any pilot-size. Its suspension (fibreglass) provides optimum shock absorbance during taxiing, take-off and landing. Once strapped in, machine and pilot become one which reflects in the feeling of a very direct flying experience, whilst remaining safe and controllable.

**The Quattro Plus can be used with the following Bailey Aviation paramotors:-**

**BAILEY 4stroke  
BAILEY JPX  
BAILEY CORSAIR  
BAILEY SNAP**

**£1995  
Incl VAT**
